Licensed to Kill (LTK)

The community for the whole pest control trade. Marcus Scruggs started LTK on 1 January 2025 so pest pros could get to know each other. What began as a video game group is now a full hub: the Discord, a podcast, tournaments and the LTK Community Hub website.

Why it works

Techs don't read ads. They show up for game night, argue about fantasy football and ask each other which product actually works. A sponsor here isn't a banner — it's the company that put on the tournament. Your brand goes where the crew already spends its downtime, with the people who buy and use pest control products every day.
